

MUHAMMAD HUNAIN

Web Developer Intern Candidate

+92 310 3188847 | hunni.khan0011@gmail.com | Karachi, Pakistan | [LinkedIn](#) | [GitHub](#)

SUMMARY

Final-year (7th semester) BS Computer Science student (CGPA 3.3, last semester GPA 3.75) at Muhammad Ali Jinnah University with hands-on experience designing and deploying multi-page responsive websites using HTML5, CSS3, JavaScript, and Bootstrap 5. Delivered 3 live projects on GitHub Pages and completed a Udemy Web Development course. Comfortable with database fundamentals through MySQL and currently expanding into PHP and WordPress to round out full-stack web development skills. Eager to bring strong front-end fundamentals, fast learning ability, and a collaborative mindset to a Web Developer Internship, with room to grow quickly into PHP-based and WordPress-driven project work.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, Responsive Web Design, DOM Manipulation, Cross-Browser Compatibility

Back-End & CMS (Currently Building): PHP, WordPress (theme customization & troubleshooting), ASP.NET, React.js

Databases: MySQL, relational database fundamentals

Programming Foundations: C++, Object-Oriented Programming, Data Structures & Algorithms

Tools: Git, GitHub Pages, VS Code, Command Line Interface, Cross-browser & cross-device testing

PROJECTS & DEVELOPMENT EXPERIENCE

PrimeInspire – Online Courses Platform

2024

HTML5 · CSS3 · Bootstrap 5 · JavaScript · GitHub Pages

- Designed and deployed a full multi-page e-learning website (Home, Courses, Blog, FAQ, About, Contact) with a responsive Bootstrap navbar, course listing cards with pricing, newsletter UI, and a branded SVG logo.
- Implemented mobile-first responsive layouts using the Bootstrap 5 grid and custom CSS, ensuring a consistent experience across all screen sizes — directly applicable to responsive theme and template work.

Employee Management System

2024

HTML5 · CSS3 · Bootstrap 5 · JavaScript · GitHub Pages

- Built a web-based HR system UI featuring a secure login page with form validation, role-based navigation structure, and a clean dashboard layout, demonstrating real-world authentication UI patterns transferable to server-side form handling.
- Applied structured component design and Bootstrap utility classes to deliver a professional, maintainable, and responsive interface.

Responsive Blog Website

2024

HTML5 · CSS3 · Bootstrap 5 · GitHub Pages

- Developed a multi-page blog (Home, Categories, Posts, Pages, Search) with post card components, a newsletter section, and a fully responsive navbar — structured for scalable content publishing, similar to a WordPress content model.
